Education

Instituto Politécnico de Santarém
Bachelor
IT Engineer
Sep 2024 - Present

Instituto Politécnico de Santarém
Higher Professional Technical Diploma
Web and Mobile Technologies
Sep 2021 - Jul 2023

I'm a Full Stack Developer and IT Engineering student with nearly 3 years of professional experience building mostly web applications. My core expertise lies in C# and Angular, but I'm tech agnostic. I'm passionate about software architecture, I actively explore Golang, microservices, and AI integrations in my specialized side projects. I'm highly adaptable and eager to learn. I'm fluent in English, and looking for a full time internship opportunity starting on August 3rd, 2026.

Experience

Independent Freelancer | Healthcare Desktop Application

Remote, Portugal
Freelancer
Apr 2026 - Present

- Architected and developed a modular desktop application using C# and MAUI for a private medical clinic, strategically designed for future commercialization as a SaaS product.
- Built a secure Document Management System (DMS) allowing users to categorize, store, and seamlessly preview medical/administrative files.
- Implemented full Organization management modules (CRUD) including complex relational integration of healthcare workers, roles, and clinics.

Bomsite Salvaterra de Magos, Santarém, Portugal
Fullstack Freelancer
Jul 2025 - Present

- Engineered custom, production-ready CMS and E-commerce platforms for corporate and public sector clients using C# (ASP.NET), JavaScript, jQuery, and Bootstrap.
- Designed automated backend workflows, cron jobs, and complex business logic to streamline internal operations and financial tracking for clients.
- Managed full-cycle software development, transitioning projects successfully from architecture to QA and client handoff.

Fullstack Developer
Jul 2022 - Oct 2022

- Development of a backoffice for a truck repair shop
- Training in ASP.NET and C#

Link Consulting Saldanha, Lisboa, Portugal
Software Engineer
Nov 2023 - Feb 2025

- Development of a project in Angular for managing documents and workflows.
- Construction of Office's add-ins with authentication that allowed the creation of processes easily and uploading files with metadata into the main project.

rabbit mobile GmbH Sete Rios, Lisboa, Portugal
Software Engineer Intern
Feb 2023 - Jul 2023

- Creation of a plugin for Figma that would transpile the Figma Nodes into Angular code.
- Testing the Figma project in a real project from scratch to measure the efficiency of the tool created, and completing the project afterwards.
- Training on Figma and design systems

Portuguese

English

Smartlock Distributed System (Academic/Personal)

Apr 2026 - Jun 2026

A high-scale distributed IoT security system (100k+ lines of code) integrating hardware validation with AI-driven security classification.

- Designed a microservices architecture communicating asynchronously via gRPC and RabbitMQ, with REST endpoints for the frontend and MQTT for ESP32 hardware communication.
- Implemented an AI-based evaluation module that triggers Multi-Factor Authentication (MFA) dynamically when high-severity anomalies are detected via RFID/sensors.
- Tech Stack: Go, gRPC, RabbitMQ, MQTT, Python (AI), C++ (ESP32), REST.

SalvaterraFightClub (via Bomsite)

Jan 2026 - Present

A comprehensive sports management back-office system built to automate club administration, membership, and financial tracking.

- Developed complex internal workflows and background automated tasks (Cron Jobs) like managing athlete registrations, seasonal pricing, and member billing status transitions automatically.
- Built an integrated billing system with automated PDF receipt generation and email dispatching for payment confirmations.
- Tech Stack: C#, ASP.NET, jQuery, Bootstrap, SQL Server.

CRVBI - Vinhos da Beira Interior (via Bomsite)

Otc 2025 - Present

An institutional and e-commerce ecosystem featuring a partner management module and live social media integrations.

- Integrated Meta's Graph API to dynamically fetch and render real-time social media content.
- Built a dual-purpose online store for physical and digital goods, including stock management synchronized with an external ERP.
- Tech Stack: C#, ASP.NET, Meta API, SQL Server.
